PO Box 2082
Burlington, NC 27216-2082

REPLY TO
ATTN OF: Maj Richard G. Augur, DO

1 Jan 05

SUBJECT: NC Wing Flight Crew Information File (NCW FCIF) #05-4: NC14 (Boone Airport)

TO: NC Wing Pilots, Commanders, and Stan/Eval members

This FCIF replaces FCIF 04 – 3. FCIF 04 – 3 will be removed from the FCIF.

IAW CAPR 60-1, the Wing Commander has authorized the use of NC14, a private airport in Boone, NC.

1. Pattern altitude is 4100'
2. Right Traffic for Rwy 31 and Left Traffic for Rwy 13.
3. Don't try to maintain visual contact with the runway on downwind. This will cause you to be too close and too high. Just fly your normal pattern and runway will come into view on base leg.
4. **If CROSSWIND component or WIND GUST factor is more than 10 knots DO NOT LAND unless good judgment and safety dictates otherwise. There are hangers close to the runway and it gets a bit unpredictable.**
5. Noise Abatement Procedure: When departing RW 31 make a right turn as soon as practical to avoid overflying hospital.

For further information contact Capt Paul Supina (H)828-265-5335.

Richard G. Augur, Maj, CAP
Director of Operations
